

PULLING EYE

Description

This ORCA® Fiber Optic Pulling Eye protects connectors while providing a pulling point with properly distributed tensions on fiber optic cable assemblies. The Fiber Optic Pulling eye has a rotating end clip to minimize fiber optic cable twisting and the connectors are protected with cable netting. The Fiber Optic Pulling Eye may be purchased as a stand-alone component or installed by us on your custom fiber optic cable assembly.

Ordering Information code:

OC-ACC-150001-01 ORCA – Pulling Eye for trunk cable
